

## BEST PRACTICE - 1

1. **TITLE OF THE PRACTICE:** Canteen services.
2. **OBJECTIVES OF THE PRACTICE:** The objectives of the canteen and meal service is to protect by reducing the risk of food-borne illness with proper sanitary conditions, and preventing adulterated food.

3. **CONTEXT:** The college canteen is located in college campus, the day students are provided meals by assuring food safety and quality. The students who come from faraway places, start their journey to the college early in the morning. The mid-day meal is provided. Even many students use canteen facilities for their breakfast tea with snacks.

4. **PRACTICE:** The management of the canteen is directly under the control of college administration. The contractor of the canteen is selected according to the available and suitable quotations. A well experienced person in food services management

Only one common eating facility (Canteen facility) shall be provided in the college campus for day students, guest of the college, teaching and non-teaching staff of the college. The management is fully committed to keeping the quality of the canteen for the utmost benefit of all concerned.

#### 5. **EVIDENCE OF SUCCESS:**

- The students, teachers, staff And outsider would have pleasure of enjoying healthy food inn pleasant and soothing environment. Time would be consumed for finding food in a single place. Variety of selective food in low price.
- The Canteen would attract more and more number of students which would enhance in economy. The canteen would match the standard of college.

# BEST PRACTICE -2

## Plastic free campus

- 1) **Title of practice:** plastic free campus
- 2) **Objective of the practice:** To make awareness about plastic pollution is damaging our environment rapidly. Waste plastic material is hard to dispose of and contributes to major pollution on earth.
- 3) **The Context :** Best practice on plastic free campus and spread awareness.
- 4) **The Practice:** Plastic Pollution is caused due to accumulation of the waste plastic material in the environment. Plastic is a non biodegradable substance .It doesn't get disposed off in the soil or water and it's effect it worse when burnt. It is thus a challenge to dispose it of remains in the environment for hundreds of years and causes air, water and land pollution. It is hazardous for the humans, animals as well as the plants. The Principal , teaching staff ,students and NSS group have resolved to make the entire college campus a plastic free zone in response to those environmental issues . On the campus designated as a plastic free zone. In regular interval the college community carry out awareness drives and sensitization workshops on the harmful impacts of single use plastic and encourage all students to avoid bringing non bio degradable plastic items to college campus. We have installed necessary alternative facilities like water units to avoid the use of plastic water bottles and encourage the use of alternative solution like cloth bags.

5) **Evidence of success**- There is a need for educational institutions to actively contribute to the effort of banning the use of single use plastics. So it is becoming a key responsibility of every citizen of our country not just to “Say No To Plastics ” but also to create awareness among the community as whole to stop this pollution and leave behind a green and pollution free place for our future generations .In our college many awareness program conducted by our NSS and red cross students to aware about harmful effects of plastic.

- 6) **Problems Encountered And Resources Required:** Plastic of course is uniquely problematic because it's non biodegradable and therefore stick around for a lot longer . it only takes a few times of bringing your own bag the store ,silverware to the college before it becomes habit. Government Institution have established different measures and Environmental safety legislation rules that can guide the population to dispose of plastic waste after utilization. The several strategies such as recycling ,bioremediation and landfills. These method's are established to have a clean environment and good plastic waste disposal.
- 7) **Notes:** Plastic positively impact our daily lives to their basic applications in household activities .they can cause different problems to human life and ecosystem if the post use disposal is not well managed.” Say No To Plastic ” awareness program will help to eradicate infections us diseases that are transmitted through polluted air and water.

## **SEVEN REASONS TO GO PLASTIC – FREE**

Brought to you by plan and the plastic pollution coalition

- 01) Single use disposable plastics have a **massive carbon footprint**. Whether made from petroleum or plants, plastic manufacturing is not efficient due to the scale of production.
- 02) Both the production and disposal of single – use plastics often emit massive amounts of dioxins, a highly toxic byproduct linked to increased cancer rates and other **human health effects**.
- 03) **Plastic last forever** : plastic can never be broken down by natural processes; every particle of plastic that has ever been created still exists in a form toxic to all terrestrial marine life.
- 04) **Plastics can be challenging to dispose of**. No all localities have the infrastructure to recycle single – use plastics; thus, many recyclable plastic take up valuable landfill space. When not able to be recycled or land filled, they are often sent to incinerators, emitting environment toxins into the atmosphere.
- 05) Plastic poisons **our food chain**; it is increasingly found in the ocean and guts of marine life, extending to affect the health of human population who rely on fish and other marine life food sources.
- 06) Going plastic – free can **save your money!** Relying on reusable items enables you to avoid constant purchasing of disposable items.
- 07) Single –use plastic items perpetuate a **wasteful, throw-away culture**. Our society is far too valuable to be thrown away.
